MOVEit CENTRAL

MOVEit™ Central Corporate

The Secure Managed File Transfer Workflow Solution Designed for Small to Mid-sized Organizations

Managing data workflows and meeting compliance requirements is just as critical for small and mid-sized organizations as they are to bigger ones. The best solutions for data workflow management are designed for large enterprises and are too costly, complicated, and labor-intensive for everyone else.

Not anymore. Now there is a secure managed file transfer workflow solution designed specifically for the needs of small to mid-sized businesses: MOVEit Central Corporate.

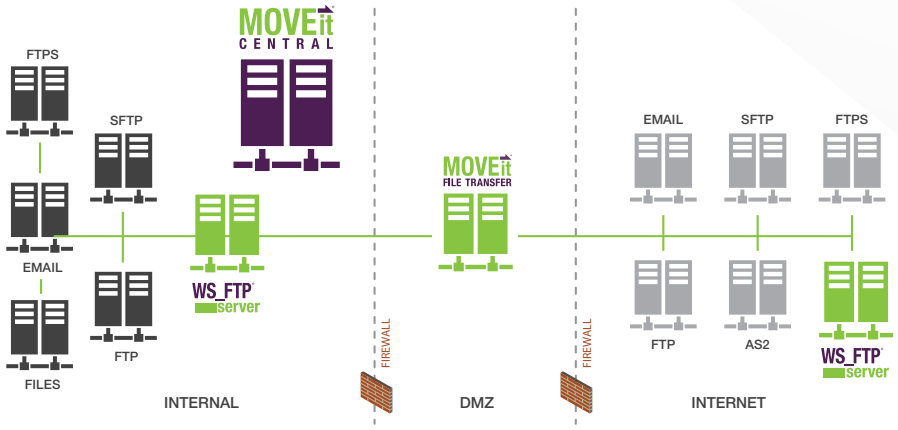
Based on the core capabilities of the MOVEit Central Enterprise solution, MOVEit Central Corporate is tailored to meet the needs of organizations that have outgrown file transfer scripting, but do not need or want an enterprise-level product. MOVEit Central Corporate offers small and mid-size organizations an affordable combination of security, compliance, automation, flexibility, and value.

The Industry's Most Secure File Transfer Workflow Engine

MOVEit Central Corporate delivers all the security found in expensive enterprise-level solutions because it uses the same core MOVEit Central security capabilities that companies and government agencies around the globe have been using and passing security compliance audits with, for years.

- **End-to-end encryption**
- **Secure FTP over SSL and SSH**
- **FIPS 140-2 validated cryptography**
- **File non-repudiation and guaranteed delivery**
- **OpenPGP file encryption and key management option**
- **Cryptographic tamper-evident audit records**

MOVEit Central Corporate helps to enable compliance with stringent regulations such as Basel II, FISMA, GLBA, HIPAA, PCI DSS, and SOX as well as other privacy and security standards.



MOVEit Central Corporate integrates into data workflows, becoming the central hub for all file and data transfer processes

Automate Your Most Complex File Transfer Processes and Workflows

Small and mid-sized organizations can use MOVEit Central Corporate to centralize, automate, and simplify the management of their file transfer processes. MOVEit Central Corporate integrates directly into your existing data workflows, becoming the central hub for managing all of your file transfers. IT staff can quickly and easily "click together" tasks that automatically transfer and process files using business rules and logic. MOVEit Central Corporate can use the capabilities below to "pull, process and push" files among all platforms, network architectures, operating systems, and protocols.

- **Create up to 50 pre-configured transfer tasks**
- **Run each task on a scheduled, event-driven or on-demand basis**
- **Simultaneously run as many as 20 separate tasks**
  MOVEit Central Corporate enables IT staff to remotely configure, monitor, and control their tasks.

Simplify Data Transfer with Flexible Administration Tools

MOVEit Central Corporate is quick and easy to deploy. An IT professional can typically download and install the software, and create and schedule their first task, in one hour or less, without the need for scripting expertise or expensive professional services. MOVEit Central Corporate is standards-based, integrates easily with your existing infrastructure, and can be run in a virtualized environment. And your organization can scale up its MOVEit Central capabilities as your file transfer requirements grow. Entering a new license key will upgrade MOVEit Central Corporate to MOVEit Central Enterprise – without reinstalling, reconfiguring, or losing any data.

The Best Value Solution

MOVEit Central Corporate delivers enterprise-level security, automation, and flexibility at a decidedly non-enterprise price. Organizations can save time and money by using it to centralize, automate, and manage their transfer activities. MOVEit Central Corporate eliminates the need to support different transfer applications, processes, logs, and reporting running on disparate systems. It is easy to use 'point and click' automation can eliminate the need to write and maintain transfer-related scripts.

Excellent value and enterprise-level security, compliance, automation, and flexibility make MOVEit Central Corporate the best secure managed file transfer workflow solution for small to mid-sized organizations.

Features and Capabilities Included in MOVEit Central Corporate

File Transfer Protocol	• FTP • SSL / FTPS • SSH / SFTP • HTTP/S	• SMTP / POP • CIFS / SMB (Accessing Network Storage) • EDIINT AS1, AS2 & A S3 (Optional Module)
Security	• Built-in End-to-End Encryption • Transport Encryption ("Data-in-Transit") • FIPS 140-2 Validated Cryptography • Encrypted Administrative Access • File Integrity Checking	• Non-Repudiation / Guaranteed Delivery • Anti-Virus Solution Integration (McAfee, Symantec & Trend Micro) • Cryptographic Tamper-Evident Logging • OpenPGP File Encryption (Optional Module Unlimited Number of Keys)
Automation & Productivity	• Up to 50 pre-configured tasks • Up to 20 simultaneously run tasks • Easily Manage Complex Workflows and Implement Granular Rules • Multiple Tasks Can Be Run Together Simultaneously	• "Pull, Process & Push" Files Among All Platforms/Architectures/OS's • Synchronization of Files and Folders on Different Systems • Automatic Checkpoint Restart
Administration	• Number of Hosts (10) • Delegation of Permissions (Host/Tasks, Groups/Users)	• Integration with Microsoft SQL Server • Unlimited Simultaneous Local/Remote Users
